

the Dexcom diabetes  
management software

# get Clarity with Dexcom

With only a few clicks, Dexcom Clarity provides access to glucose data, trends, and patterns\*. This enables you to deliver **effective and efficient care** for your patients with diabetes.

\*An internet connection is required for patients to send their glucose data to Dexcom Clarity via a compatible smart device: [dexcom.com/compatibility](https://dexcom.com/compatibility).

**DEXCOM**  
CLARITY

# intuitive insights

## CLEAR

Dexcom Clarity delivers concise glucose summaries, while also enabling clinicians to focus on individual data points when needed, for streamlined appointments.

## SIMPLE

Using a single, customisable code for your clinic, CGM users can opt to automatically share glucose data.‡

**87%** of endocrinologists using Dexcom Clarity agree it offers easy access to patients' health data. †,§,1

## MOTIVATING

By making glucose data accessible and understandable, via dedicated mobile and desktop apps, Dexcom Clarity can help support proactive and autonomous diabetes management.

## SECURE

Data protection is paramount. Following industry-leading standards, Dexcom Clarity stores data in compliance with all privacy regulations and provides secure individual logins for your team.

**94%** of endocrinologists using Dexcom Clarity agree or strongly agree that it prepares them to make healthcare decisions. †,§,1

AGP; ambulatory glucose profile. †Healthcare providers will only be able to view a patient's glucose data if the patient elects to share it with them through Dexcom Clarity. §Based on a survey of US HCPs, n=121. References: 1 dQ&A Endocrinologists' Perceptions and Usage of Clarity, 2023

# unique features

## ✓ Overview

Quickly assess time in range, other metrics such as GMI and sensor wear time, and device alert settings

## ✓ 5th-gen AGP report

Access the latest and most advanced AGP report with customisable glucose ranges

## ✓ Best day

Help motivate patients with their best time-in-range results and discuss contributing factors

## ✓ Daily Report

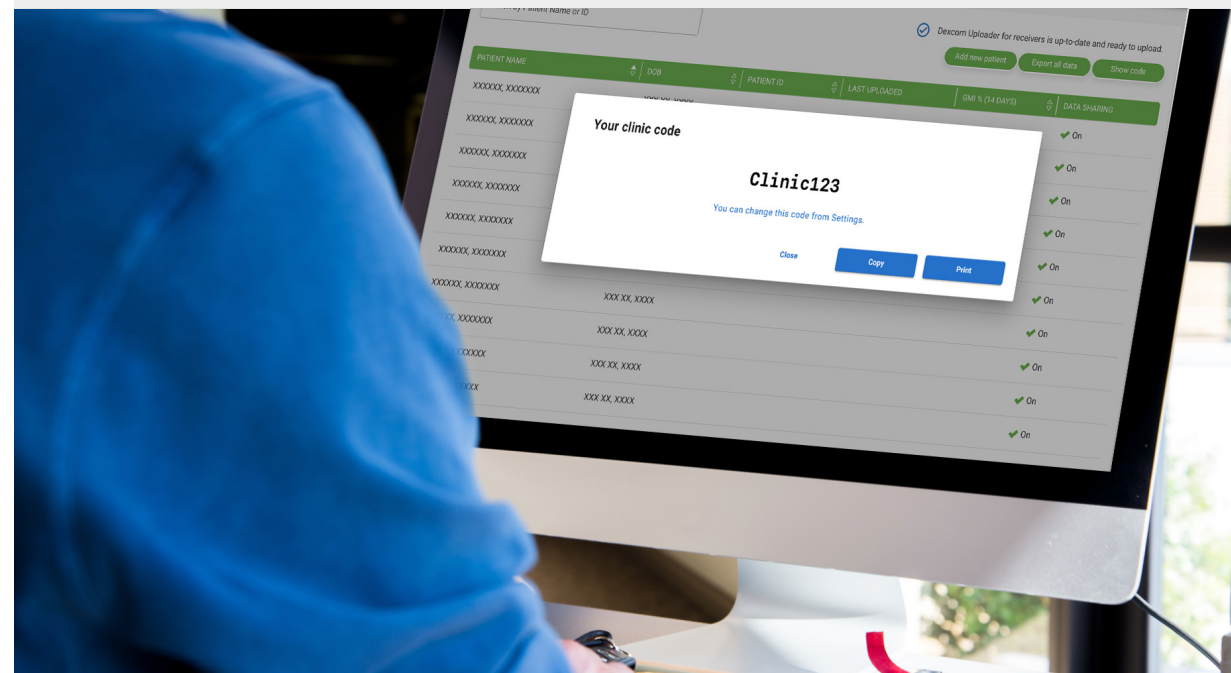

Easily view data over graphs and event tables with alerts, logged actions, and health app information

## ✓ Compare reports

Quickly evaluate the impact of changes to treatment or lifestyle interventions

## ✓ Copy-as-text

Simplify charting by copying patients' key data and CGM metrics at a touch of a button

## for efficient interactions

**91%** of endocrinologists using Dexcom Clarity agree it makes it easier to explain diabetes data to patients.<sup>‡,§,1</sup>

By supporting efficient interaction with patients, Dexcom Clarity could help you and your team to maximise the value of each appointment.

#Healthcare providers will only be able to view a patient's glucose data if the patient elects to share it with them through Dexcom Clarity. §Based on a survey of US HCPs, n=121. ||Engagement is defined as accessing Dexcom Clarity reports and opting into automatic notifications. \*Compared to non-users. References: 1 dQ&A Endocrinologists' Perceptions and Usage of Clarity, 2023. 2 Akturk HK, et al. Diabetes Technol Ther. 2021;23(S1):S21-S26.

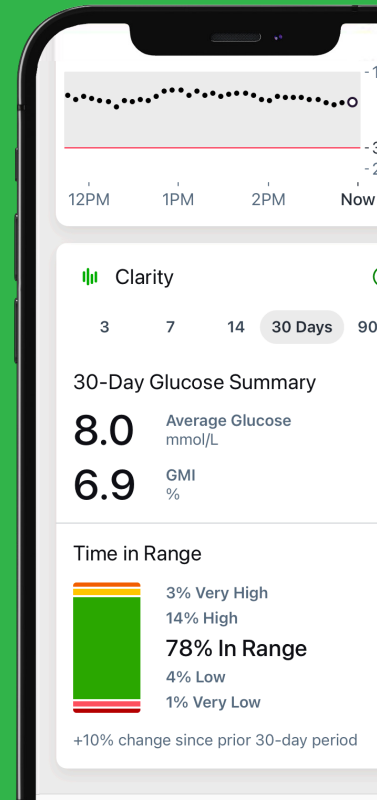

## and improved outcomes<sup>2</sup>

By improving engagement, Dexcom Clarity users can achieve, on average,

**2 more hours in range per day.**<sup>||,¶,2</sup>

Outside of the clinic, the in-app Clarity Card provides patients a daily snapshot of key diabetes metrics and trends.

This can help to show how small changes can make a big impact.

THE IN-APP CLARITY CARD PROVIDES GLUCOSE INSIGHTS AT A GLANCE

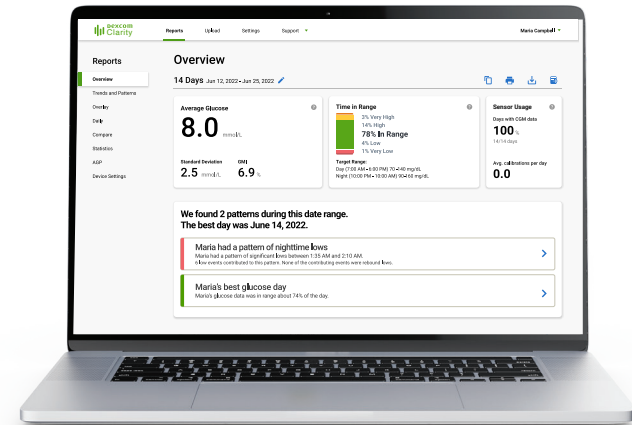

**Highly engaged\* Dexcom Clarity users experience up to 16% increased TIR compared to non-users.**<sup>||,2</sup>

streamlined diabetes management starts here

# set up Dexcom Clarity today in 3 easy steps

- 1 Register your clinic at [clarity.dexcom.eu/professional](https://clarity.dexcom.eu/professional)
- 2 Invite staff to use the clinic portal, and invite patients to share their CGM data
- 3 Access, analyse, print and discuss reports with patients

For more information please speak to your territory manager.
